

Create And Configure IBM Cloud Service Create IBM Watson IoT Platform And Device

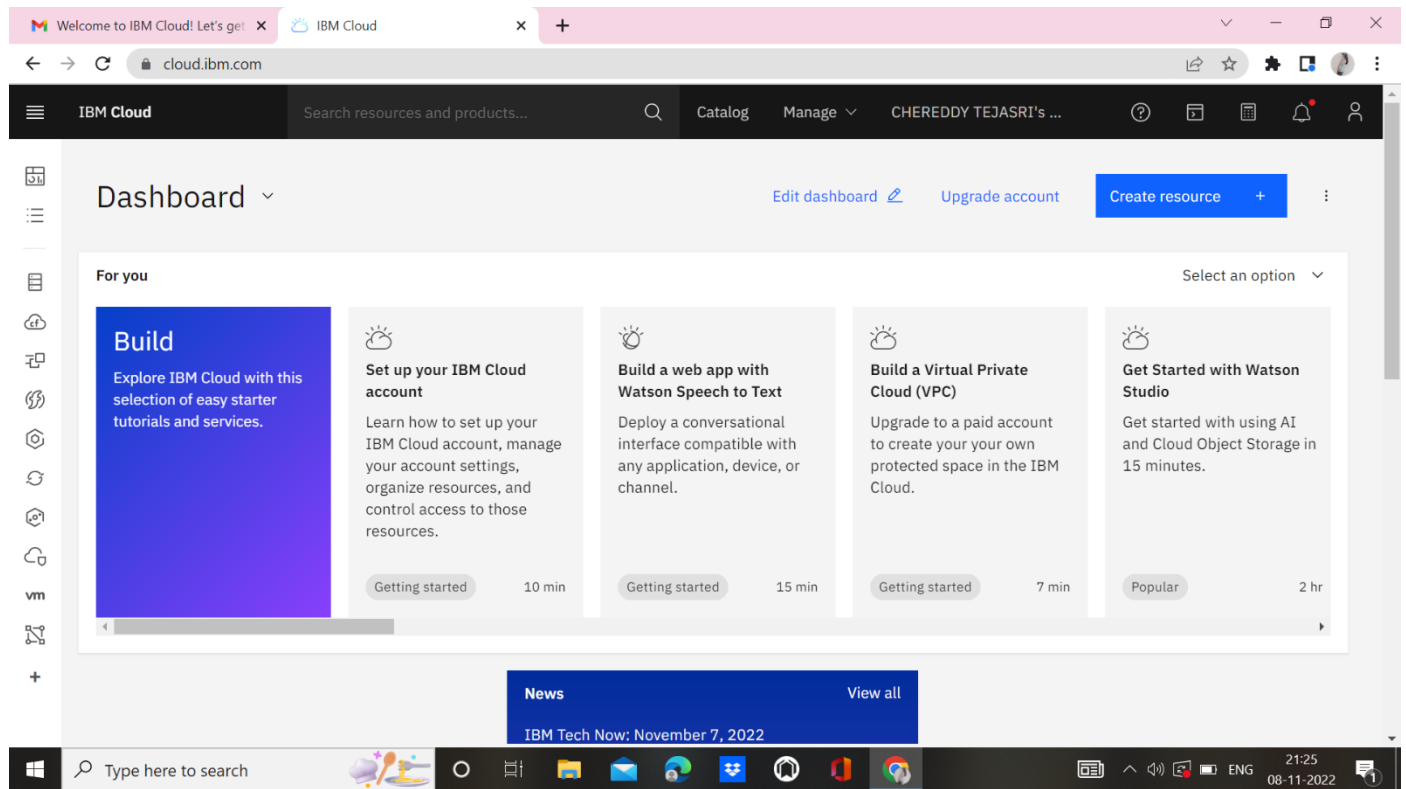

Date	10 November 2022
Team ID	PNT2022TMID23814
Project Name	IoT Based Safety Gadget For Child Safety Monitoring & Notification
Maximum Marks	4 Marks

STEPS

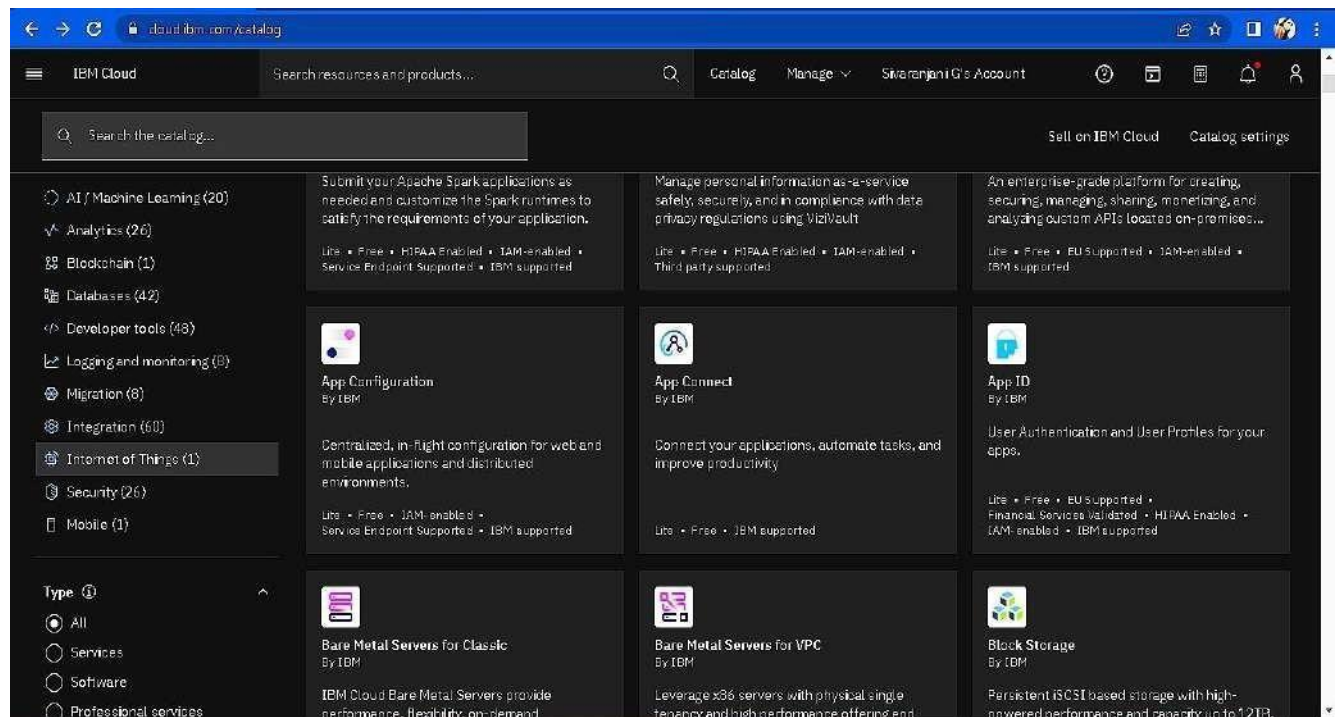

1. Firstly create an IBM cloud account with IBM id and password

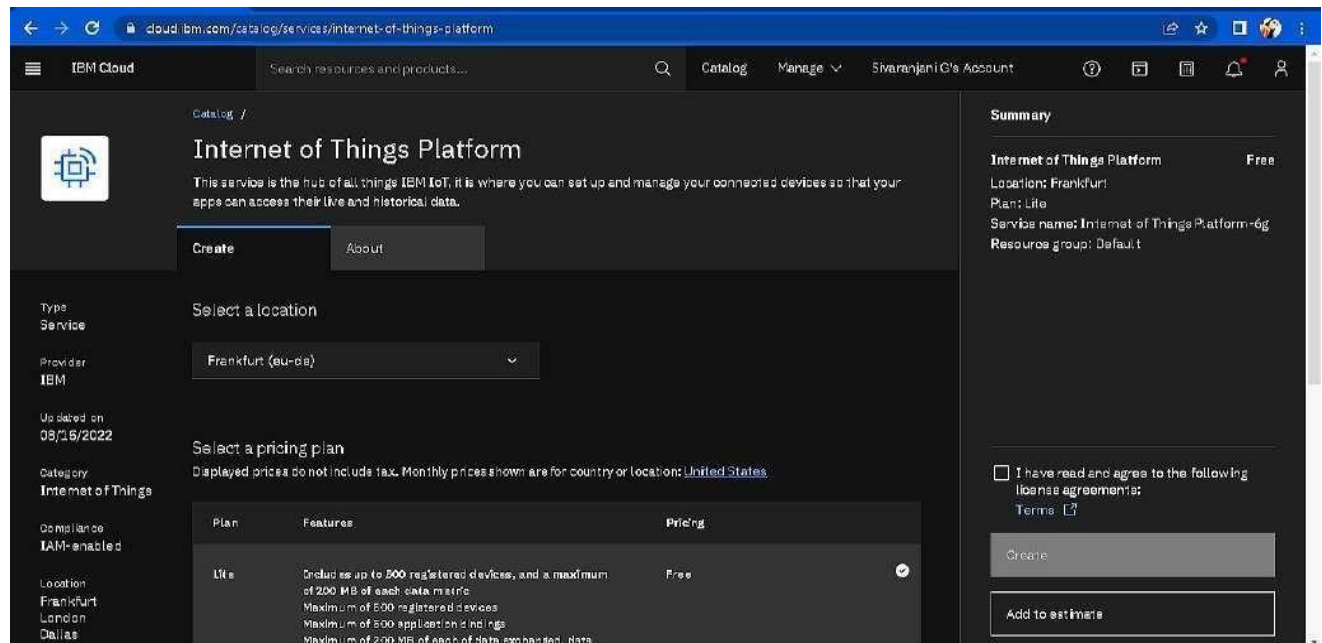

2. Home page of IBM cloud

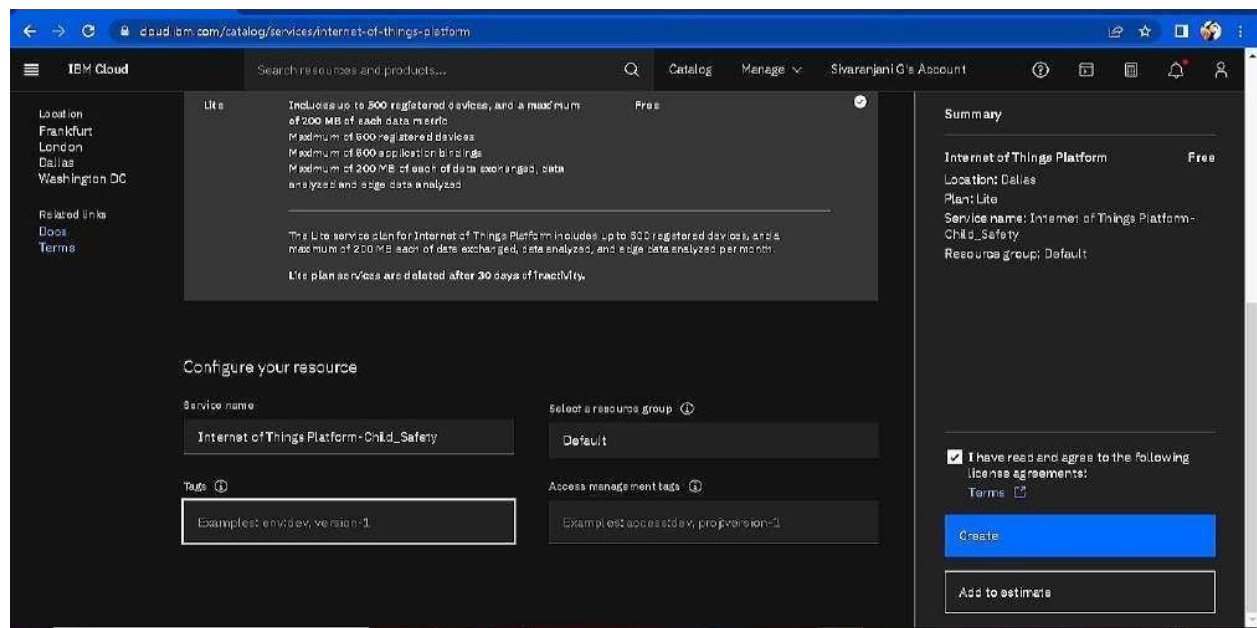

3. Click on the catalog on the top

4. Click on IoT in the category mentioned

5. If already a lite is present delete it else u can't create another

6. Enter the location and in the configure your resource type the service name and choose the plan, tick the agree with it agreements and then click on create

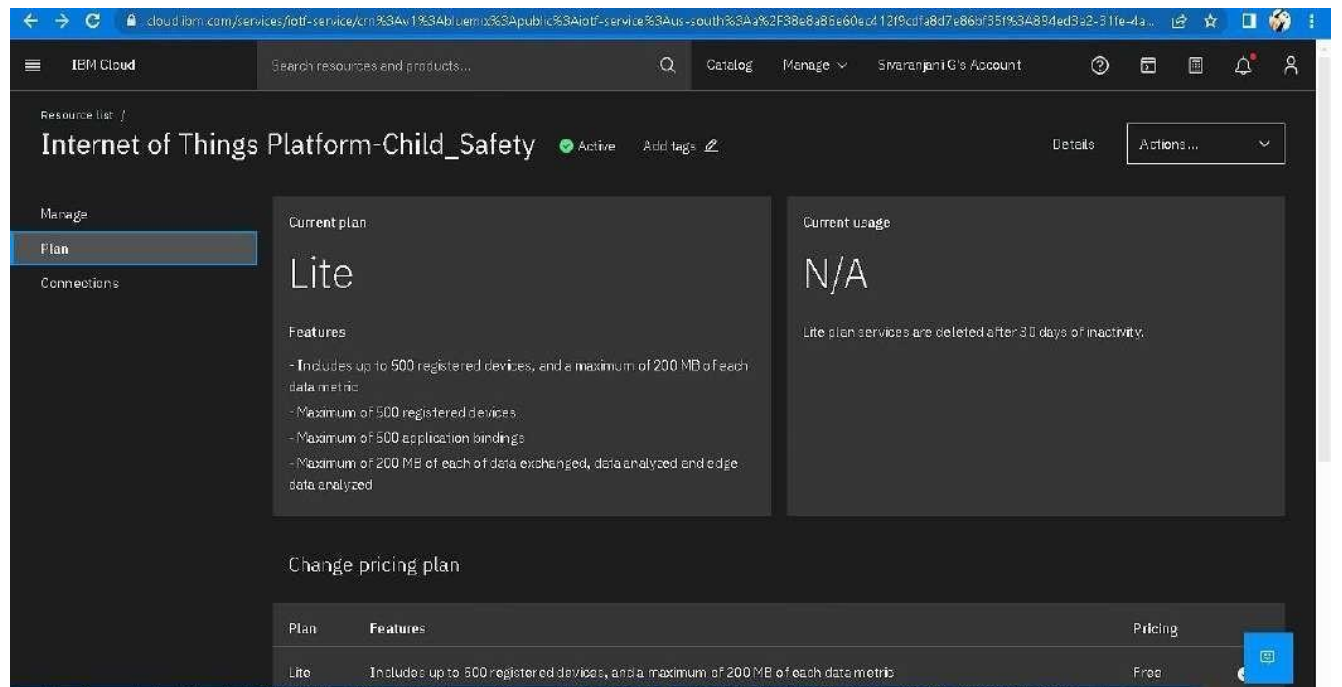

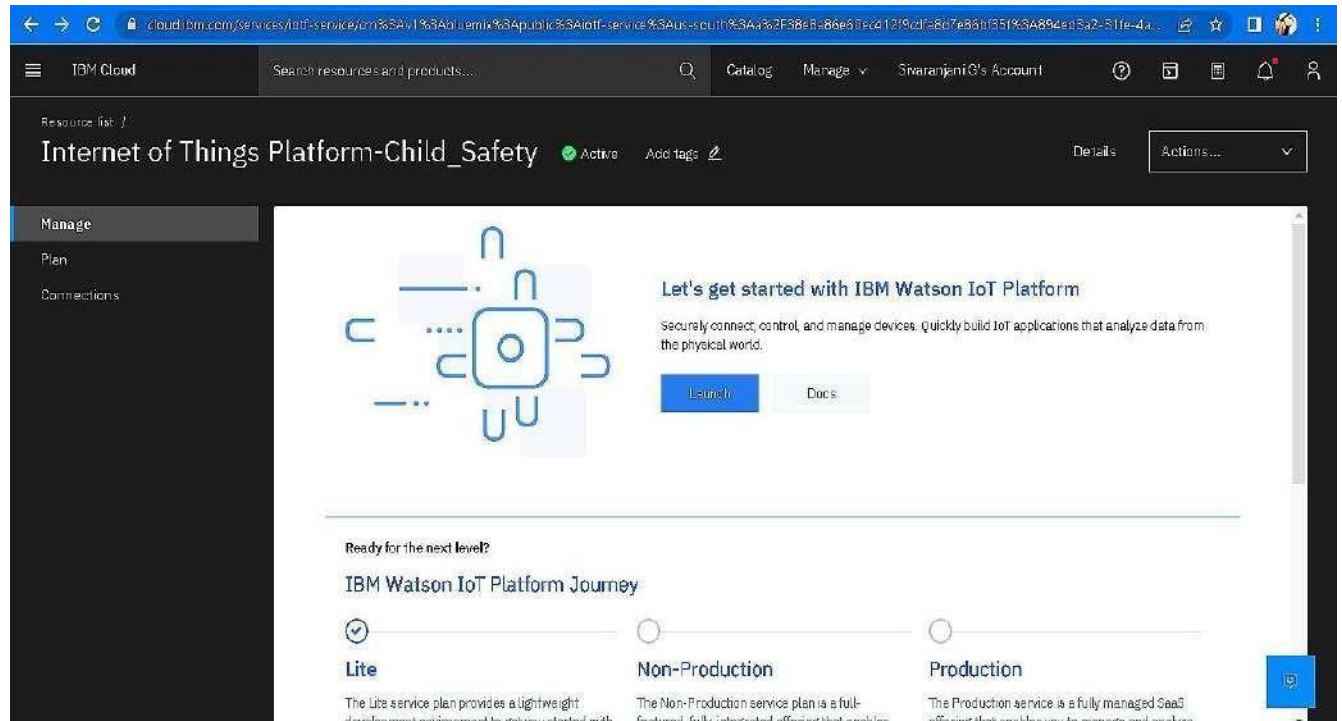

The screenshot shows the IBM Cloud 'Internet of Things Platform' creation page. The 'Create' tab is active. On the left, a sidebar lists details: Type: Service, Provider: IBM, Updated on: 06/16/2022, Category: Internet of Things, Compliance: IAM-enabled, and Location: Frankfurt, London, Dallas. The main content area has 'Select a location' with 'Frankfurt (eu-de)' selected. Below it, 'Select a pricing plan' shows a table with one plan, 'Life', which is selected. The table lists features like up to 500 registered devices and 200 MB of data. On the right, a 'Summary' panel shows the service name, location, plan, and a checkbox for agreeing to terms, which is currently unchecked. 'Create' and 'Add to estimate' buttons are at the bottom right.

Plan	Features	Pricing
Life	Includes up to 500 registered devices, and a maximum of 200 MB of each data metric. Maximum of 500 registered devices. Maximum of 500 application bindings. Maximum of 200 MB of each of data exchanged, data analyzed and edge data analyzed.	Free

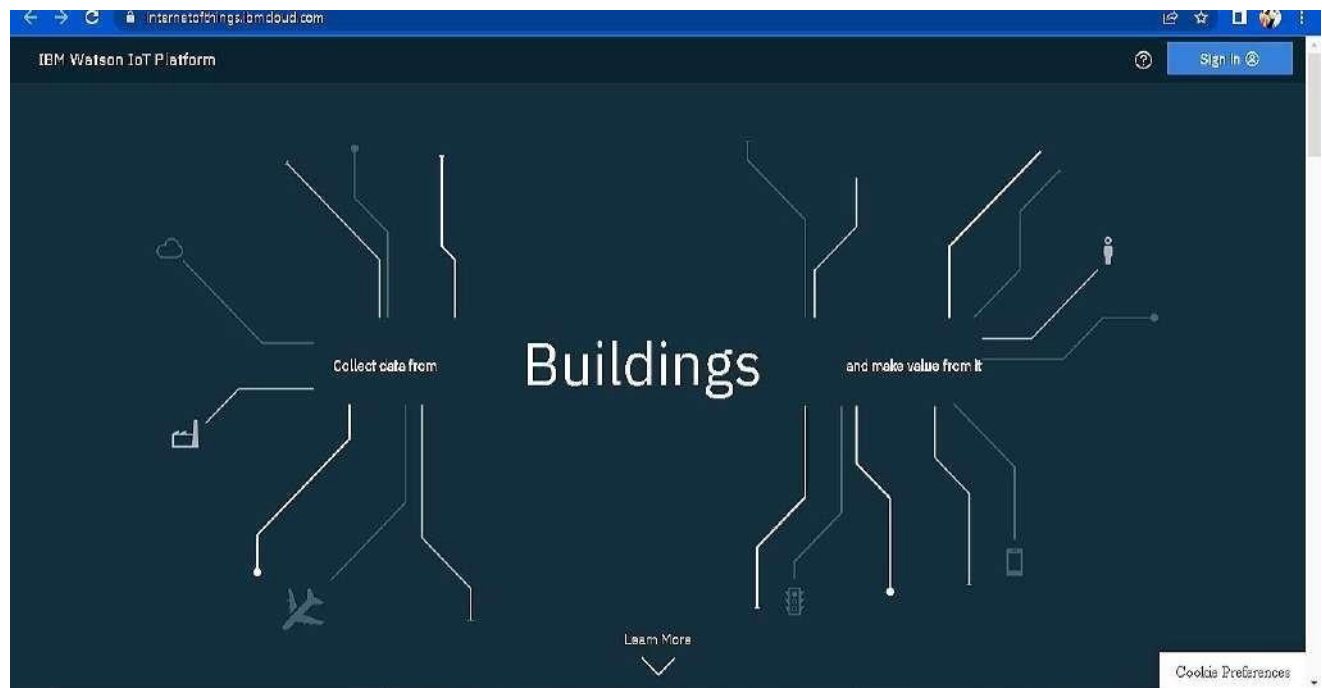

This screenshot shows the same IBM Cloud creation page but with 'Dallas (us-south)' selected as the location. The 'Life' plan remains selected in the pricing table. In the 'Summary' panel on the right, the checkbox 'I have read and agree to the following license agreements:' is now checked. The 'Create' button has turned blue, indicating it is ready to be clicked. The 'Add to estimate' button remains grey.

Plan	Features	Pricing
Life	Includes up to 500 registered devices, and a maximum of 200 MB of each data metric. Maximum of 500 registered devices. Maximum of 500 application bindings. Maximum of 200 MB of each of data exchanged, data analyzed and edge data analyzed.	Free

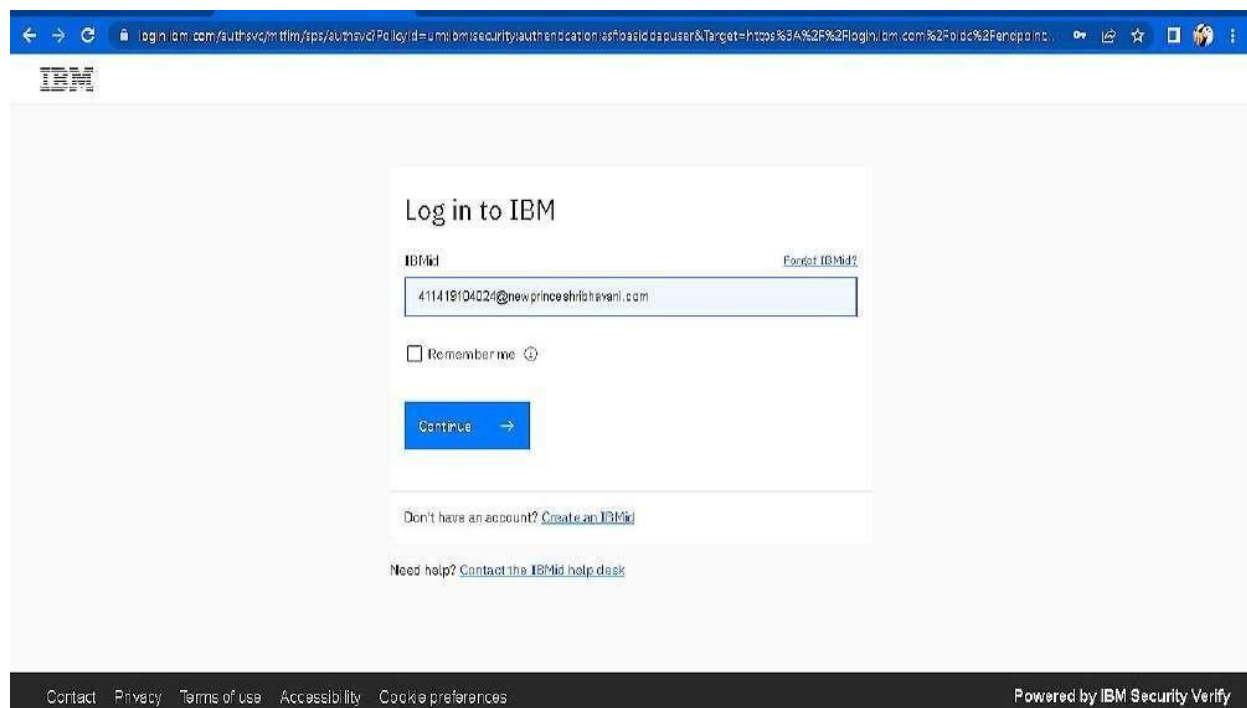

7. Internet of Things Platform Child_safety will be created, where there are different options like manage, plan, and connection (manage is for launch, Plan gives us the idea about the payment package and its upgrades, and lastly the connection is for to connect IoT with other services)

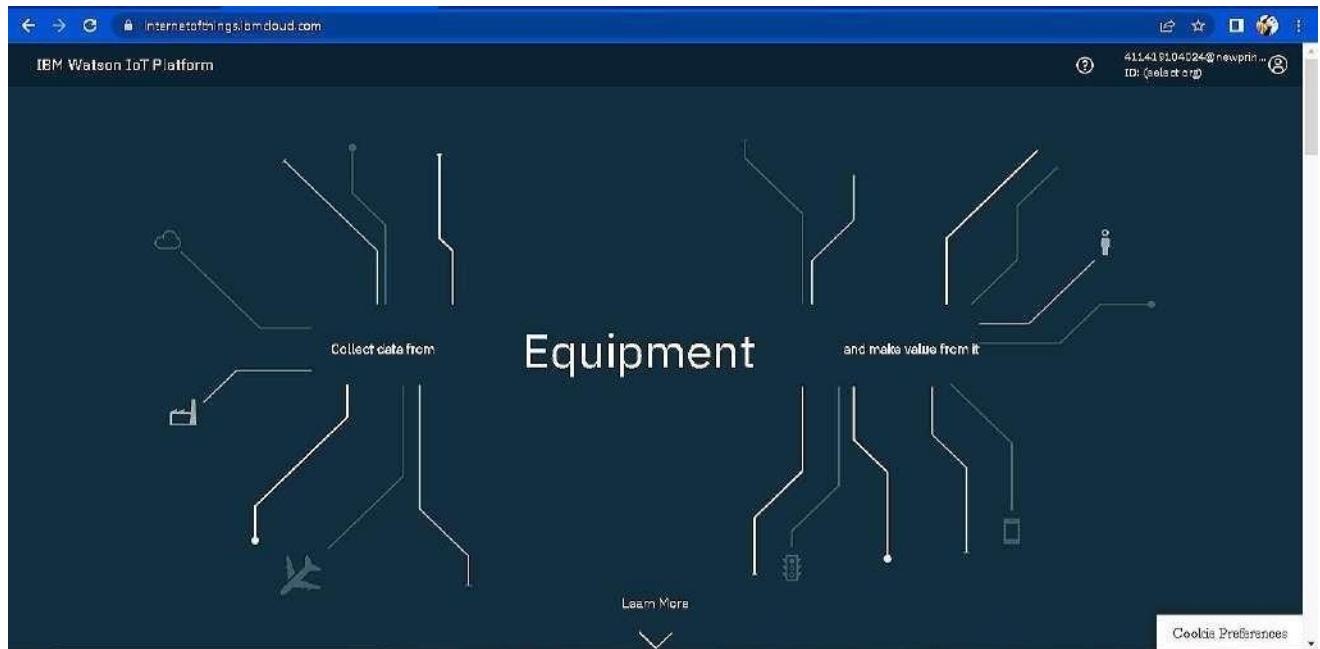

8. Clicking on the launch button in the manage tab, it will open to this

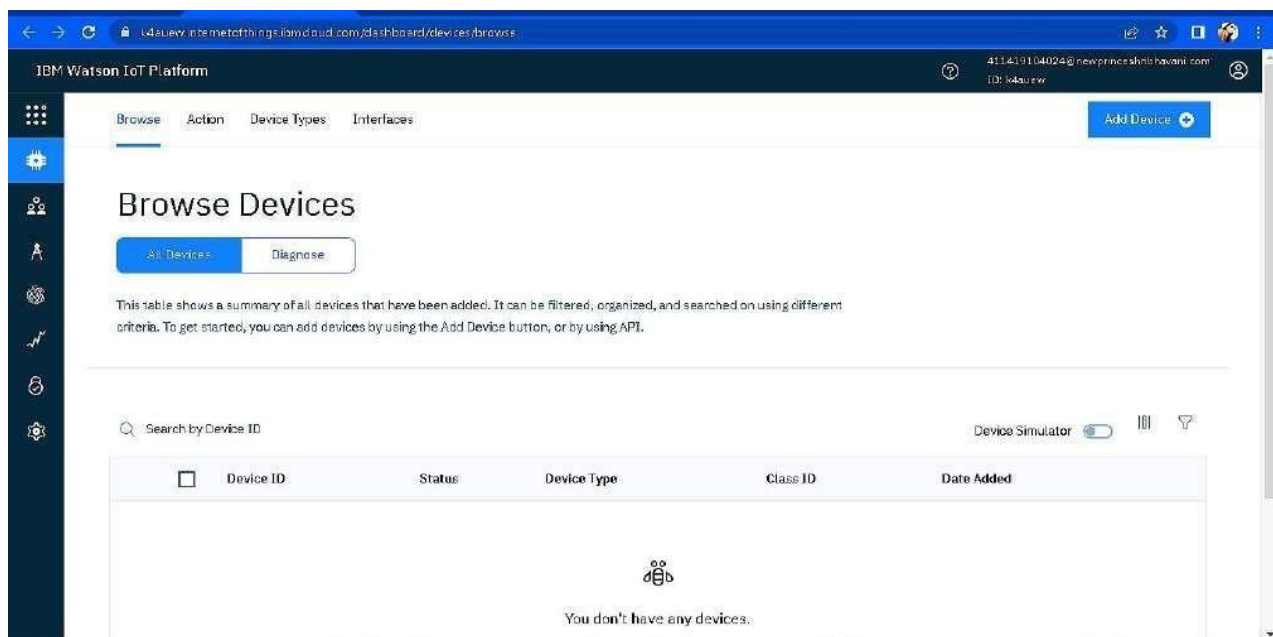

9. Enter the details to sign in to the Watson Cloud to create a device

10. Once logged in the name will be displayed and it goes back to the first page

11. And again clicking on the launch button will open this tab, the device will help in the creation of the devices, the addition of devices, and the display of details of the devices

12. The member tab is add the teams members to work in the platform

Generate API Key

14. Click on the device tab and click on the add device button, then give the device type and device id and click next

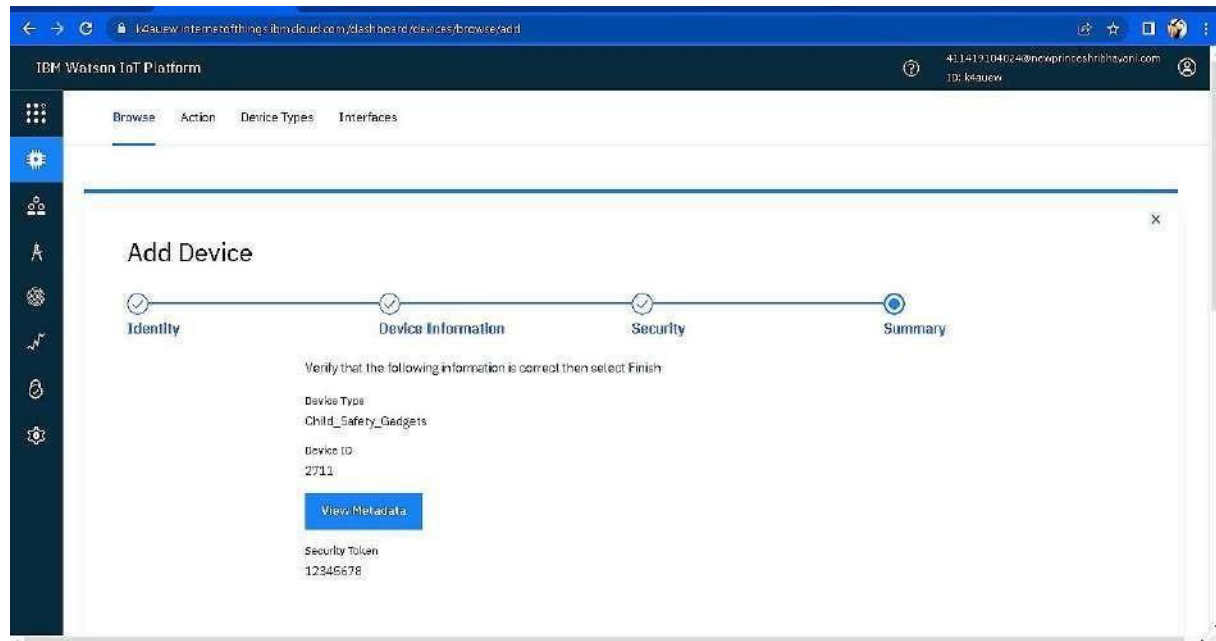

The screenshot shows the 'Add Device' page in the IBM Watson IoT Platform. The page has a dark blue header with the IBM logo and 'IBM Watson IoT Platform' text. A navigation bar at the top includes 'Browse', 'Action', 'Device Types', and 'Interfaces'. The 'Add Device' section features a progress bar with four steps: 'Identity' (selected), 'Device Information', 'Security', and 'Summary'. Below the progress bar, a message states: 'Select a device type for the device that you are adding and give the device a unique ID.' There are two input fields: 'Device Type' with a dropdown menu showing 'Select or create a device type...' and 'Device ID' with a text input field 'Enter Device ID'. At the bottom right of the 'Add Device' section are 'Cancel' and 'Next' buttons. Below this section is a 'Browse Devices' section with 'All Devices' and 'Diagnose' buttons.

15. This page to enter extra details and of the hardware

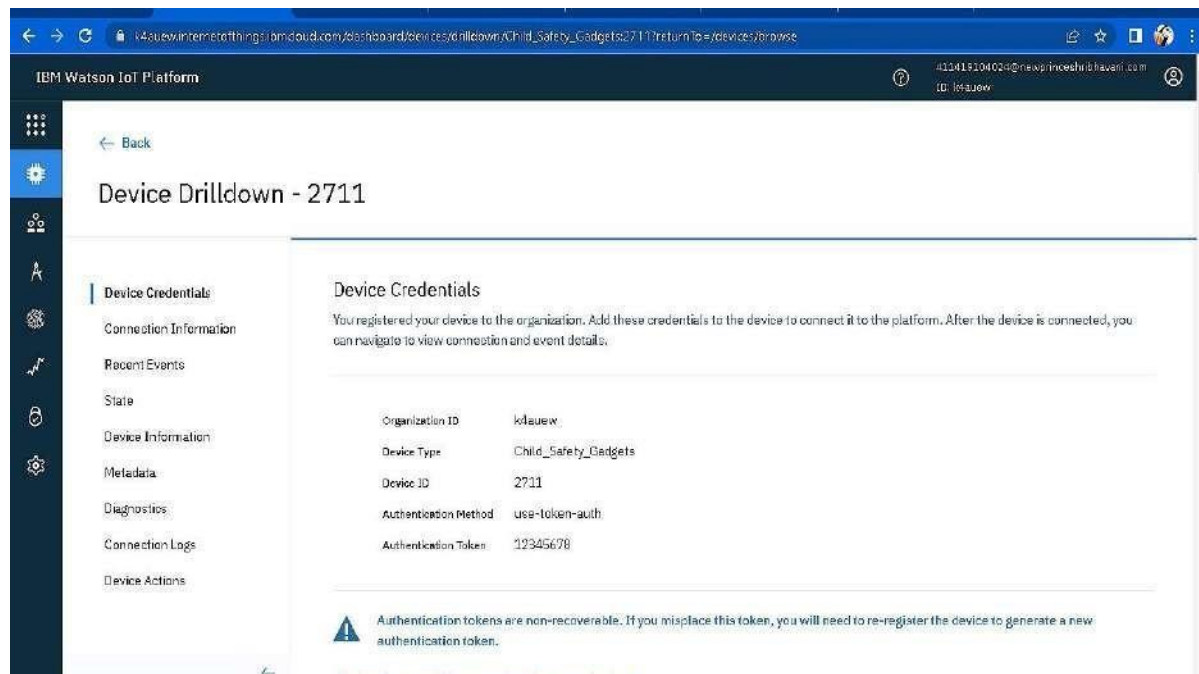

The screenshot shows the 'Add Device' page in the IBM Watson IoT Platform, specifically the 'Device Information' step. The progress bar now shows 'Identity' as completed and 'Device Information' as the current step. A message states: 'You can modify the default device information and enter more information about the device for identification purposes.' The page contains several input fields for device details: 'Serial Number' (text input), 'Model' (text input), 'Description' (text input), 'Hardware Version' (text input), 'Manufacturer' (text input), 'Device Class' (text input), 'Firmware Version' (text input), and 'Descriptive Location' (text input). There is also an 'Add Metadata' button with a plus icon. At the bottom right of the 'Add Device' section are 'Back' and 'Next' buttons.

16. Clicking next it goes to the security where we do authentication token id.

17. Clicking on next it goes to the summary of the device then click finish

18. The device credentials will be displayed with all the details

Save the details of the device as the authentication tokens are non-recoverable and if misplaced then we have to create a new one.

19. Clicking on the device tab we can now see the added device. Clicking on it will display the other details.

It has different tabs like Identity, Device Information, State and login.

Connection Status: Disconnected

In a similar way, we can create n number of devices with a 50 per page limit as per the requirement of our project.

20. The Boards will display card for the project.

RESULT:

An IBM Watson cloud for IoT and a device is created
